

# Buckinghamshire Prevention & Early Intervention Framework

<p><b>Level four – The project/service targets people who need support reducing the impact of a significant and negative event in their lives.</b></p>
<p><b>Level Three - The project/service targets people with multiple, complex and long-standing difficulties that will require a customisation of services to meet their needs.</b></p>
<p><b>Level Two - The project/service targets people where problems are already beginning to manifest themselves and action is needed to prevent them becoming serious or worse</b></p>
<p><b>Level One – The project/service targets people before problems can be seen, anyone can access the services.</b></p>

**Universal provision is available to all and needs to be inclusive.**

**When vulnerability increases other services may be required as children and young people have greater assessed need.**
